Audio Controls

Note: Control operations are described. Check your vehicle for the types of controls used.

TUNE/Selector knob/bar:

Changes the radio station.

AM/FM/XM buttons:

Selects AM, FM1, FM2, XM1, or XM2 (if equipped)

Preset Buttons:

Selects the desired station stored in a band (AM/FM1/FM2/XM1/XM2). To store a station, press and hold the desired preset button until you hear a beep, then release.

SKIP buttons/bar:

Seeks upward (>>) or downward (<<) to find the next station with a strong signal.

A.SEL button/bar:

Turns on AUTO SELECT – This scans both bands and stores the strongest stations in the preset buttons of each band.

Tip: You will not lose your selected presets. They will come back when you turn off AUTO SELECT.

CD (CD/AUX) button:

Selects the CD player or CD changer.

Audio Display

Audio information is shown in the center display located above the audio controls.

(EX, EX-L display shown) (Navigation display shown)

Note: When the parking or headlights are on, the instrument panel brightness control knob can be used to adjust audio system illumination.

Selector Knob/Interface Dial (if equipped)

Most audio system functions can be controlled by standard buttons, bars, and knobs. In addition, you can access some functions by using the selector knob on the audio system. Press ENTER to select an item.

Selector Knob

Interface Dial

Interface Dial (models with Navigation)

Many audio and navigation functions can be accessed or controlled by using the interface dial. The dial consists of:

- The selector dial Turn clockwise or counterclockwise to scroll through the display items and adjust the levels.
- · ENTER BUTTON Use to select items.

SOUND Adjustment

Sound level adjustment is accessed by pressing the SOUND button. On EX and EX-L models, the selector knob (non-navigation models) can be used. For these models, do this:

- 1. Press and release the MENU button.
- 2. Turn the selector knob to move to any of these settings:

BASS TREBLE FADER BALANCE SUBW (EX-L only) SVC CLOCK ADJUST (on 6-CD system, this is accessed by the MENU button).

- 3. Press the selector knob to choose the desired setting.
- 4. Turn the selector knob to adjust the setting up or down.
- 5. Press the MENU button to return to the original display.

Using the Remote Audio Controls

VOL buttons: Adjusts the volume.

MODE button: Changes the system to the next mode (AM/FM1/FM2/CD/XM1/XM2).

CH buttons:

Radio:

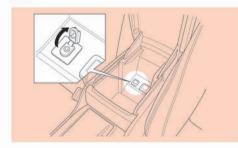

- Press and release to change to the next of previous preset station.
- Press and hold until you hear a beep. The next station (+ or -) is selected.

CD:

 Skips to the beginning of the next track or the start of the current track.

Auxiliary Input Jack

The auxiliary input jack is located inside the center console compartment. It will accept auxiliary input from standard audio accessories. To use, connect a compatible audio unit to the jack. To use a connected compatible audio unit, press the AUX or CD/AUX button

Radio Data System (RDS)

When an RDS radio station is selected, the station frequency and name are displayed. Otherwise, only the frequency is displayed.

Program Service (PS) Name Display - When selected, the name of the selected RDS station is displayed. To turn ON or OFF, press and release the TITLE button. "PS ON" or "PS OFF" appears in the display.

When either FM band is selected, RDS program category can be selected, using the either side (▲ or ▼) of the CATEGORY (models with XM)/FOLDER (models without XM) bar to display and select a RDS group. See the owner's manual for the principle RDS categories.

RDS Search - Press and release either side of the SKIP bar/button to search up and down for the next RDS station in your selected category with a strong signal. If ALL is selected, all RDS stations will be searched.

RDS SCAN - Press and release the SCAN button to sample all available RDS stations in your selected RDS category. If ALL is selected, all available RDS stations will be scanned. Press the button again when a desired station is reached.

Note: RDS Search and SCAN features function with the PS name display on or off.

Disc Player Contols

Note:

- Control operations are described. Check your vehicle for the types of controls used.
- Files in MP3/WMA mode are the equivalent of tracks in CD mode.
