

HDMI VIDEO

Play video from a compatible device through your vehicle when it is stopped.

Playing HDMI Video

Select the
HDMI icon
from Source.

1. Connect a compatible device to an HDMI cable. Connect the HDMI cable to the HDMI port in the front console.
2. From the Home screen, select Audio. Select Source and select the HDMI icon.
3. From the connected device, launch the video to view on the display in the vehicle.

Notes:

- Video will not display while the vehicle is moving.
- The device or video resolution must be 720p or lower to view in the vehicle.
