Radio Data System

Radio Data System (RDS)
When an RDS radio station is selected, the station frequency and name are displayed. Otherwise, only the frequency is displayed.

Program Service (PS) Name Display: Displays the name of the selected RDS station. To turn ON/OFF, press and the TITLE button.

CATEGORY bar: Displays and selects an RDS group.

RDS Search: Press either side of the SKIP bar to search up and down for the next RDS station in your selected category.

RDS SCAN: Press the SCAN button to sample all available RDS stations in your selected RDS category. Press again to stop the scan.

RDS Scan/Search (on navigation screen)
To search or scan RDS:
1. Press the AUDIO button, then push down the selector knob.
2. Turn the knob to select RDS search, then press ENTER.
3. Turn the knob to select a desired RDS.
4. Push the selector to the right to switch modes (skip or scan), then press ENTER.
