INSTRUMENT PANEL

Learn about the indicators, gauges, and displays related to driving the vehicle.

Indicators briefly appear with each engine start and then go out. Red and amber indicators are most critical. Blue and green indicators are used for general information. **Malfunction Indicators**

These are the most critical indicators. If they come on and stay lit while driving or at

any other time, there may be a problem. See your dealer if necessary.

BRAKE

• Brake fluid is low.

Brake system

• The brake system has a problem.

Press the brake pedal lightly to check pedal pressure. If normal, check the brake fluid level when you stop. If abnormal, take immediate action. If

necessary, downshift the transmission to slow the vehicle using engine braking. Have your vehicle repaired immediately. Low oil pressure Engine oil pressure is low. Stop in a safe place. Open the hood. Check the oil level, and add oil if necessary. If the indicator does not turn off, have your

vehicle repaired immediately. **Charging system** The battery is not charging. Turn off all electrical items, but do not turn off the vehicle to prevent further battery discharge. Have your vehicle repaired

immediately.

or missing.

Supplemental Restraint System (SRS) There is a problem with one of the airbag systems or seat belt tensioners.

Smart Entry system*

There is a problem with the smart entry system.

• The emissions control system may have a problem, or the fuel cap is loose

(Blinks) A misfire in the engine's cylinders is detected. Stop in a safe place, and wait for the engine to cool down.
