# **INSTRUMENT PANEL**

Learn about the indicators, gauges, and displays related to driving the vehicle.

Indicators briefly appear with each engine start and then go out. Red and amber indicators are most critical. Blue and green indicators are used for general information.

# **Malfunction Indicators**

These are the most critical indicators. If they come on and stay lit while driving or at any other time, there may be a problem. See your dealer if necessary.

# BRAKE

## **Brake system**

U.S.

## The brake system has a problem.

Brake fluid is low.

Press the brake pedal lightly to check pedal pressure. If normal, check the brake fluid level when you stop. If abnormal, take immediate action. If necessary, downshift the transmission to slow the vehicle using engine braking. Have your vehicle repaired immediately.

## Low oil pressure

Engine oil pressure is low. Stop in a safe place. Open the hood. Check the oil level and add oil if necessary. If the indicator does not turn off, have your vehicle repaired immediately.

## **Charging system**

The battery is not charging. Turn off all electrical items, but do not turn off the vehicle to prevent further battery discharge. Have your vehicle repaired immediately.

## Supplemental Restraint System (SRS)

There is a problem with one of the airbag systems or seat belt tensioners.

## Malfunction indicator lamp (check engine light)

- The emissions control system may have a problem or the fuel cap is loose or missing.
- (Blinks) A misfire in the engine's cylinders is detected. Stop in a safe place and wait for the engine to cool down.

#### Anti-lock Brake System (ABS)

There is a problem with the anti-lock brake system. Your vehicle still has normal braking ability, but no anti-lock function.

## Tire Pressure Monitoring System (TPMS)

There is a problem with the tire pressure monitoring system.

## CMBS

There is a problem with the system, the temperature is too high, or the camera is blocked.

## Vehicle Stability Assist (VSA)

There is a problem with the VSA system.

## Brake system

There is a problem with the brake system.

Canada

## **Electric Power Steering (EPS)**

There is a problem with the EPS system.

## Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)

There is a problem with the system, the temperature is too high, or the radar sensor is blocked.

## Lane Keeping Assist System (LKAS)

There is a problem with the system, the temperature is too high, or the camera is blocked.

## **Road Departure Mitigation (RDM)**

There is a problem with the system.

## **Condition Indicators**

These indicators may require you to perform an action.

BRAKE U.S.

## Parking brake

Release the parking brake before driving. You will hear a beep if you drive with it not fully released.

Canada

## Seat belt reminder

Make sure seat belts are fastened for you and all passengers. The indicator blinks and beeps sound continuously if you and/or your front passenger has not fastened your seat belts when you begin driving. If the indicator remains on after seat belts are fastened, see your dealer.

#### Low fuel

Refuel as soon as possible. If the indicator blinks, there is a problem with the fuel gauge. See your dealer.

#### Low tire pressure

Stop in a safe place, check tire pressures, and inflate tire(s) if necessary. Recalibrate the TPMS after adjusting air pressure. The indicator also appears if your vehicle is fitted with the compact spare tire\*. Have your regular tire repaired or replaced as soon as possible.

#### System message\*

When a condition or malfunction indicator comes on, a message also appears in the driver information interface\*. Check the display for more information.

## Immobilizer

Your key or remote transmitter cannot be recognized by the vehicle. If the indicator blinks, you may not be able to start the engine. Turn the vehicle off and then on again. If it continues to blink, there may be a problem with the system. See your dealer.

## Ready

The vehicle is ready to drive.

## POWER Power System

SYSTEM The High Voltage battery is too hot or there is a problem with the electric vehicle system.

# EV

The vehicle is moving using electric power only.

# **On/Off Indicators**

These indicators remind you when an item is on or off.
