

Climate Control System

- Press the **AUTO** button to activate the climate control system.
- Press the **ON/OFF** button to turn the system on or off.
- Press the **FRONT WIP** button to defrost the windshield.

Dual-zone climate control system

- Air flows from floor and windshield defroster vents.
- Air flows from floor vents.
- Air flows from floor and dashboard vents.
- Air flows from dashboard vents.

Rear Climate Control Panel*

- Press the **AUTO** button to activate the rear climate control system.
- Press the **(ON/OFF)** button to turn the system on or off.

* Not available on all models

Climate Control System

Dual-zone climate control system

Using Automatic Climate Control

The automatic climate control system maintains the interior temperature you select. The system also selects the proper mix of heated or cooled air that raises or lowers the interior temperature to your preference as quickly as possible.

Use the system when the engine is running.

1. Press the **AUTO** button.
2. Adjust the interior temperature using the temperature control switch.
3. Press the **ON/OFF** button to cancel.

Switching between the recirculation and fresh air modes

Press the  button and switch the mode depending on environmental conditions.

Recirculation Mode (indicator on): Recirculates air from the vehicle's interior through the system.

Fresh Air Mode (indicator off): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

Using Automatic Climate Control

During idle-stops, air-conditioning is suspended, and only the blower remains active. If you do not want air-conditioning suspended, press Auto Idle Stop **OFF** button to cancel idle-stop.

If any buttons are pressed while using the climate control system in auto, the function of the button that was pressed will take priority.

The **AUTO** indicator will go off, but functions unrelated to the button that was pressed will be controlled automatically.

To prevent cold air from blowing in from outside, the fan may not start immediately when the **AUTO** button is pressed.

If the interior is very warm, you can cool it down more rapidly by partially opening the windows, turning the system on auto, and setting the temperature to low. Change the fresh air mode to recirculation mode until the temperature cools down.

When you set the temperature to the lower or upper limit, **Lo** or **Hi** is displayed.

Pressing the **ON/OFF** button switches the climate control system between on and off. When turned on, the system returns to your last selection.

While ECON mode is active, the climate control system may have reduced cooling performance.

■ Defrosting the Windshield and Windows

Pressing the  button turns the air conditioner system on and automatically switches the system to fresh air mode.

■ To rapidly defrost the windows

1. Press the  button.
2. Press the  button.

☒ Defrosting the Windshield and Windows

For your safety, make sure you have a clear view through all the windows before driving.

Do not set the temperature near the upper or lower limit.

When cold air hits the windshield, the outside of the windshield may fog up.

If you press the  button during Auto Idle Stop, the engine restarts automatically.

☒ To rapidly defrost the windows

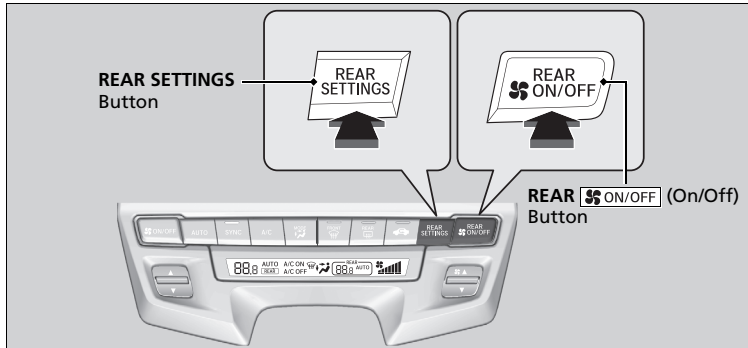

After defrosting the windows, switch over to fresh air mode.

If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.

Dual-zone climate control system

Rear Climate Control System

Using the Rear Climate Control System

Use the system when the engine is running.

1. Press the **REAR ON/OFF** button.
2. Press the **REAR SETTINGS** button.
 - The system switches to the rear control mode for 10 seconds. The **REAR** indicator appears on the display.
3. Press the **AUTO** button.
 - The rear system changes to AUTO mode.
 - The system automatically adjusts the fan speed and airflow levels to maintain the set rear temperature. Change the temperature if necessary.
 - To turn off the rear climate control system, press the **REAR ON/OFF** button.

Tri-zone climate control system

Using Automatic Climate Control

The automatic climate control system maintains the interior temperature you select. The system also selects the proper mix of heated or cooled air that raises or lowers the interior temperature to your preference as quickly as possible.

Using Automatic Climate Control

Press the **FRONT CLIMATE** button to display A/C, MODE, and fan control information on the audio/information screen for several seconds. Select icon to turn on or off A/C, change the vent mode, or change the fan speed.

During idle-stops, air-conditioning is suspended, and only the blower remains active. If you do not want air-conditioning suspended, press Auto Idle Stop **OFF** button to cancel idle-stop.

If any buttons are pressed while using the climate control system in auto, the function of the button that was pressed will take priority. The **AUTO** indicator will go off, but functions unrelated to the button that were pressed will be controlled automatically.

To prevent cold air from blowing in from outside, the fan may not start immediately when the **AUTO** button is pressed.

If the interior is very warm, you can cool it down more rapidly by partially opening the windows, turning the system on AUTO, and setting the temperature to low. Change the fresh mode to recirculation mode until the temperature cools down.

When you set the temperature to the lower or upper limit, **Lo** or **Hi** is displayed.

Use the system when the engine is running.

1. Press the **AUTO** button.
2. Adjust the interior temperature using the driver's side or passenger's side control switch.
3. Press the **ON/OFF** button to cancel.

Using Automatic Climate Control

Pressing the **ON/OFF** button switches the climate control system between on and off. When turned on, the system returns to your last selection.

While ECON mode is active, the climate control system may have reduced cooling performance.

■ Switching between the recirculation and fresh air modes

Press the  button and switch the mode depending on environmental conditions.

Recirculation Mode (indicator on): Recirculates air from the vehicle's interior through the system.

Fresh Air Mode (indicator off): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

■ Defrosting the Windshield and Windows

Pressing the  button turns the air conditioner system on and automatically switches the system to fresh air mode.

■ To rapidly defrost the windows

1. Press the  button.
2. Press the  button.

☒ Defrosting the Windshield and Windows

For your safety, make sure you have a clear view through all the windows before driving.

Do not set the temperature near the upper or lower limit.

After defrosting the windows, switch over to fresh air mode.

If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.

Tri-zone climate control system

Rear Climate Control System

Using the Rear Climate Control System From the Front Panel

Use the system when the engine is running.

1. Press the **REAR CLIMATE** button.
2. Press the **REAR CLIMATE** button to display AUTO, MODE, temperature control, and fan control information on the audio/information screen for several seconds.
3. Select the **AUTO** icon.
 - The rear system changes to AUTO mode.
 - The system automatically adjusts the fan speed and airflow levels to maintain the set rear temperature. Change the temperature if necessary.
 - To turn off the rear climate control system, select the **ON/OFF** icon.

Rear Climate Control System

LOCK appears on the rear control panel while the rear lock is on.

If the rear lock is on while in SYNC mode, the rear control panel is disabled. **LOCK SYNC** appears on the rear control panel.

Using the Rear Climate Control System From the Front Panel

Select the **LOCK** icon to turn the rear lock mode on and off.

While the rear lock mode is on, the rear control panel is disabled.

► The color of **LOCK** icon on the audio/information screen changes from gray to blue.

■ Using the Rear Climate Control System From the Rear Panel

Use the system when the engine is running.

1. Press the **AUTO** button.
2. Adjust the interior temperature using the rear temperature control bar.
3. To turn off the rear climate control system, press **ON/OFF** button.

▣ Using the Rear Climate Control System From the Rear Panel

When the rear lock mode is off, the temperature of the rear passenger compartment can be controlled independently.
