

3-MODE DRIVE SYSTEM

Select one of three different modes of driving styles.

Driving Modes

Press one of the drive mode buttons. The Range Display changes accordingly. A message briefly appears on the MID, and the mode indicator remains on.

Sport Mode

- Enhanced steering and performance response.
- POWER/CHARGE gauge extends to indicate increased power.
- Mode display turns red.

Normal Mode

- Achieves the best balance between driving performance and energy economy.
- Mode display turns white.

Econ Mode

- Energy economy is prioritized over cruise control and the climate control system.
- Mode display turns green.
