

GAUGES AND DISPLAYS

Provides you with electric and battery-related information about your vehicle.

How It Works

Power/Charge Gauge

Shows whether the motor is being powered or the battery is being charged.

Battery Charge Level Gauge

Shows the remaining battery charge.

Range Display

Shows the estimated distance you can travel on the remaining battery charge. This changes based on your driving mode

Electricity Consumption Indicators

Shows the electricity consumption for the climate control system, headlights, and audio system. The indicators increase with electrical load.
