

# REARVIEW CAMERA

For added convenience, the area behind your vehicle is displayed to help you navigate while backing up.

## How It Works

- When you shift into Reverse (R), a real-time image of the area behind your vehicle is shown in the navigation display.
- The rearview display turns off when you shift out of Reverse.

## Parking Guide Lines

- Yellow parking guide lines also appear to help you judge distance. They can be turned on or off.
- **Press and hold** CANCEL until the guide lines turn on or off. They remain off until you turn them on again.
