Traffic Rerouting™

The system can automatically provide detours around traffic or incidents when a destination is set and Traffic Rerouting is turned on in Navi Settings or you can choose to manually reroute.

1. Say “*Display traffic on my route*” to view a list of incidents on your route.
2. Say the number of the incident you want to avoid.
3. Say “*Avoid*” and the incident list returns.
4. Say “*Reroute*” to set the new route.
