

■ Folding Down the Rear Seats

The rear seat-backs can be folded separately to make room for large items in the cargo area.

1. Pull a release lever to release the lock.
2. Fold down the seat-back.

Push the seat-back up firmly until it locks into place (red tabs in the release lever go down) to return it to its original position.

Make sure all items in the cargo area or items extending to the rear seats are properly secured. Loose items can fly forward if you have to brake hard.
