## Vehicle Stability Assist® (VSA®)

Also known as Electronic Stability Control (ESC), VSA helps to stabilize the vehicle during cornering if the vehicle turns more or less than what was intended. It assists in maintaining traction on slippery surfaces by regulating engine output and selectively applying the brakes.

### ■ Turning VSA On or Off

VSA is turned on every time you start the engine, even if you previously turned it off. If you turn VSA off, your vehicle has normal braking and cornering ability, but traction control will be less effective.

Press and hold the VSA OFF button until you hear a beep to turn VSA on or off. The VSA OFF indicator appears when the system is off.

When VSA is off, traction control stops functioning, which may make it easier when trying to free your vehicle if it is stuck in mud or snow.
