NAVIGATION

Learn how to enter a destination and operate the navigation system[1].

Basic Navigation Operation

A real-time navigation uses GPS and a map database to show your current location and help guide you to a desired destination. You can operate the system using voice commands or the system controls.

To reduce the potential of driver distraction, certain manual functions may be inoperable or grayed out while the vehicle is moving. Voice commands are always available.

■   **Steering Wheel Controls**

Use the steering wheel controls to give voice commands.

(Talk) Button - Press and release to activate.

(Hang-up/Back) Button - Press to cancel.

■   **Talk Button Tips**

The system recognizes commands in the Voice Command Index, see Voice Portal Commands.

- When using the Talk button, wait for a beep before saying a command.
- To bypass the system prompts, simply press the Talk button again to say your command.
- Speak in a clear, natural voice.
- Reduce all background noise.
- Adjust the dashboard vents away from the microphone in the ceiling.
- Close the windows and moonroof[1].
