

Starting to Drive

Turn on the power mode and start the power system to begin driving.

■ Before Starting the Power System

Make sure the parking brake is applied. Keep your foot firmly on the brake pedal when starting the power system.

The power system is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 m). When starting the power system in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear defogger in order to reduce 12-volt battery drain.

■ Changing the Power Mode

Use the POWER button to cycle through power modes or start the power system.

Accessory or On mode: Press the POWER button once without pressing the brake pedal for Accessory mode. Press it again for On mode.

Starting the power system: Press and hold the brake pedal, then press the POWER button. Keep your foot firmly on the brake pedal until the Ready to Drive indicator comes on.

Turning the power mode off: Shift to Park (P), then press the POWER button.
