Voice Control Operation
Your vehicle has a voice control system that allows hands-free operation. The voice control system uses the (Talk) and (hang-up/back) buttons on the steering wheel and a microphone near the map lights on the ceiling.

Voice Recognition
To achieve optimum voice recognition when using the voice control system:

- Make sure the correct screen is displayed for the voice command that you are using. The system recognizes only certain commands.
- Available voice commands.
- Close the windows and moonroof*.
- Adjust the dashboard and side vents so air does not blow onto the microphone on the ceiling.
- Speak clearly in a natural speaking voice without pausing between words.
- Reduce any background noise if possible. The system may misinterpret your command if more than one person is speaking at the same time.

Voice Control Operation
When you press the button, a helpful prompt asks what you would like to do. Press and release the button again to bypass this prompt and give a command.

Voice Recognition
The voice control system can only be used from the driver’s seat because the microphone unit removes noises from the front passenger’s side.
