Voice Control Operation

Your vehicle has a voice control system that allows hands-free operation. The voice control system uses the \( \text{Talk} \) and \( \text{hang-up/back} \) buttons on the steering wheel and a microphone near the map lights on the ceiling.

Voice Recognition

To achieve optimum voice recognition when using the voice control system:

- Make sure the correct screen is displayed for the voice command that you are using.
- Close the windows and moonroof*.
- Adjust the dashboard and side vents so air does not blow onto the microphone on the ceiling.
- Speak clearly in a natural speaking voice without pausing between words.
- Reduce any background noise if possible. The system may misinterpret your command if more than one person is speaking at the same time.

* Not available on all models
When the (Talk) button is pressed, available voice commands appear on the screen. For a complete list of commands, say "Voice Help" after the beep or select Voice Help.

You can see the list of commands in Voice Info on the Info Menu screen. Select Info, then select MENU.

The system only recognizes the commands on the following pages, at certain screens. Free form voice commands are not recognized.
